

Spring Home Refresh

There is just something about the weather warming up and flowers blooming in spring that makes everything feel fresh and new! We often hear the phrase “spring cleaning.” It is a time when many people reorganize, clean and get rid of things around their homes. It is also a great time to give your home décor a refresh! You can take things you already have and move them into new places, add a few new pieces and you have a whole new mood to your space!

Mirrored Trays

Trays of all shapes, sizes and materials are one of my favorite décor pieces to add to a space. They can easily be moved to different locations and styled in various ways. Mirrored trays are especially handy for adding interest to an area.
