The Renew Team

Healthy New Year Tip

As we head into 2025, we're embracing a theme here at Renew Integrated Medical Spa—one focused on Beauty, Balance, and Beyond. This year is about more than resolutions, it's about reclaiming your confidence, prioritizing self-care and wellness, and enhancing your natural beauty.

Balance

Balance in wellness is so important, because it's what helps you to not only survive, but thrive. We can help you find balance in your life by correcting hormone imbalances (via hormone replacement therapy,) optimizing your nutrition, assisting in medical weight loss, improving cognitive performance, and much more. Overall, our mission is to go beyond the symptoms, and treat the root cause through an Integrative and Functional Medicine approach.

Beauty

When it comes to beauty and aesthetics in general, one of our highest priorities is achieving facial balance. As Texarkana's most experienced medical spa, we've learned a thing or two over the years about achieving a perfect balance between your features, to bring out the absolute best in you. From neurotoxins and fillers, to dozens of aesthetic services—we've got the tools and treatments to send you into 2025 feeling "brand new." Scan the QR Code to be taken to our interactive treatment builder, and receive a custom plan for exactly how to achieve your aesthetic goals for 2025.

Beyond

We often hear from our patients (both old and new), "I didn't know you guys did that!" So, part of our New Year's Resolution is to introduce more of what we offer to you! However, instead of listing off our rather long list of incredible services and products, we'd rather keep this focused on exactly what you need instead. For aesthetic treatments, scan the QR code to fill out our treatment builder. For wellness concerns, feel free to call us at 903-255-6398.

Holland Meador RN, BSN & Brandy Early RN, MSN

Healthy New Year Tip

As the New Year unfolds, it is the perfect time to embrace natural approaches to skin rejuvenation. Your skin is a reflection of your overall health and small consistent efforts can yield remarkable results. Natural rejuvenation is about enhancing what you already have by prioritizing the body's natural healing processes to revitalize your skin with treatments promoting collagen production and skin renewal.

Our Specialties

SkinRNs, locally owned by two registered nurses, offers a fresh perspective on results driven aesthetic treatments. For those looking to rejuvenate their appearance and embrace a healthier lifestyle, we offer a range of services that support overall skin health as well as medically managed weight loss.

Our Services

Botox®, Jeuveau, Dysport®
 Morpheus8® RF Microneedling
 Lumecca IPL
 SkinPen® Microneedling
 Glo2Facial®
 Chemical Peels
 IV Hydration
 Medically Managed Weight Loss

Healthy New Year Tip

Drink it, don't sip it! Sipping your tea, Dr. P, coffee, juice, etc., all day acts as an acid bath on your teeth which results in cavities. Preferably drink them during meals or follow them with water or xylitol gum, like Trident or Ice Breakers. Chewing gummies, cough drops, and mints often causes tooth decay. Opt for sugar-free versions, brush after consuming them, or chew xylitol gum afterward to help.

Lippian Dental Team

Healthy New Year Tip

This year, focus on creating harmony between your mind, body, and spirit. Set aside time each day for movement, meditation, and mindful breathing to ground yourself and reduce stress. Remember, yoga isn't about perfection—it's about showing up for yourself, finding balance in the chaos, and embracing the journey toward inner peace. Let's flow into 2025 together, one pose at a time.

Specialties

We offer a variety of yoga classes in hot, warm, or cooled settings, along with pilates and private group or individual sessions.
